At EACH well child appointment we measure weight & length, growth charts are reviewed, a physical exam is performed and anticipatory guidance is given.	
Flu Vaccine	>6 months, annually usually starting in September
HPV Vaccine	Dose #1 after puberty (started before age 15yr)
	Dose #2 – 6 months after dose #1
	If >15yr then 3 doses are required
Men B Vaccine	Dose #1 at age 16yr
	Dose #2 – 4 weeks after 1 st dose
CHADIS Developmental Screener	Our office uses an online developmental screening tool called CHADIS. The Link is on our webpage or visit CHADIS.com. Practice code:rainbowped. Please complete at home before EACH well child check ages 4 months to 5 years.

Please check with your insurance carrier for coverage of these items BEFORE your visit.
